PROFESSIONAL SUMMARY

I am a Software Engineer who loves tackling complex problems and turning them into simple, working solutions. I enjoy building clean, scalable code and reliable systems. My time studying in China taught me to be curious and adaptable and bring that energy to every project I work on. Am I always excited about technology? *A capital YES* I enjoy using technology to make life easier for not only myself but other people too. My aim is to make an impact on billions of lives through technology and getting the small details right.

SKILLS

TECHNICAL PROFICIENCIES

Backend Development (Java, C++, C# ASP .Net, Node.js, Python (Django), Linux server, Unicorn, Nginx) | **Frontend Development** (HTML, CSS, JavaScript, Vue.js, React) | **Database Management** (PostgreSQL, MySQL, SQL Server, SQLite, NoSQL: MongoDB) | **Cloud Infrastructure/Computing** (AWS, GCP, Digital Ocean, Heroku, EC2 Virtual machines, managed databases, Terraform, Docker, Kubernetes, Deployment, Prometheus, Grafana, CI/CD, Github Actions, MFA, OAuth2/OIDC) | **Data Analysis & Machine Learning** | **Networking** | **Software Testing** (SoapUI, Postman) | **System Administration** | **DevOps & Tools** | **Git & Git Version Control** | **Windows** (Basic Computer, Active Directory, Powershell) | **Linux and Linux server** (Ubuntu, Debian) | **Networking** (WLAN, DNS, DHCP, TCP/IP, UDP, HTTP/HTTPS, SSL/TLS, Fail2ban, Wireshark) | **IT Admin** (Linux CLI, Network Basics, PostgreSQL Administration, Docker, Cloud Platforms, Monitoring & Alerts, Security Hardening, Kubernetes, CI/CD, Backup & DR) | **IT Support/Help Desk** (Ticket management, Windows, MacOS, Linux, Hardware, Software, Networking, Cloud & SaaS Support, Email & Messaging Support, Software Installation & Licensing, Security Basics, Mobile device support, Remote support tools, Asset management, Password management, Microsoft 365)

SOFT SKILLS

Project Management | Problem-Solving | Communication | Teamwork & Adaptability | Customer Service | Leadership | Time Management | Emotional Intelligence | Conflict Resolution | Decision-Making | Stress Management | Negotiation | Coaching/Mentoring | Creative Thinking

EDUCATION SKILLS

University: Advanced Mathematics A1 & A2, Introduction to Computer Systems, C++ Programming, Comprehensive Chinese (1, 2, 3, 4) , Art of Communication, College Physics A & B, Java (OOP), Discreet Mathematics, Probability Theory and Statistics, Data Structure and Algorithm, Linear Algebra A & B, Principles of Computer Organizations, Computer Networks, The Principles of Operating Systems, Human-Computer Interaction, Practice of Software Engineering Projects, Database Systems, Principles of Compiler, Software Engineering, Artificial Intelligence, Windows Programming, E-Commerce, Software Testing Technology, Information Security, UML and Software Modeling, Web Application and Development, Digital Image Processing, Linux Principles and Application, XML and XML Applications, Big Data Processing and Analysis, Cloud Computing,

Dissertation: *Natural Language Processing – Machine Learning*

High School: Mathematics, Physics, Consumer Studies, Life Science, Life Orientation, English, Afrikaans 1st Additional Language.

PROFESSIONAL EXPERIENCE

Aligner + Labelbox (Remote) Programmer/Developer (Python, C, C++, Ruby & Rust) 2026 – Present
AI Training: Using programming expertise to train and evaluate generative AI models, ensuring the information the models generate is reliable and relevant.

- Reviewing Model Generated Code
- Developing production ready code
- Ensuring that the models follow software engineering best practices, writing accurate documentation, making regular commits with meaningful commit messages, and reviewing their own work (Git version Control).
- Ensuring that the models implement the correct architecture, handles edge cases, and meets the task scope.

Grind Reel (Remote) Software Engineer 2023 – 2025

- Design, develop, and maintain scalable software solutions using PostgreSQL for database management and AWS for cloud infrastructure
- Employ Python and Django for backend development while working on frontend development to create responsive and dynamic user interfaces
- Ensure seamless integration between components, collaborating with cross-functional teams to optimize system performance and enhance the overall user experience

Huawei Technologies South Africa, Johannesburg, Gauteng

Assistant Network Engineer

2021 – 2023

- Advanced through various engineering roles, contributing to significant projects in networking, fintech, digital support, and software testing
 - Supported network setup, maintenance, and configurations as a Network Engineer, improving service reliability
 - Developed secure fintech solutions with a focus on payment gateway integration as a Fintech Software Engineer, while optimizing digital services and user interfaces as a Digital Support Engineer to enhance customer satisfaction
 - Contributed to cloud platform deployments and upgrades as a Technical Engineer and conducted software testing for subscriber usage as a Software Testing Engineer.
-

EDUCATION

National School of Government (eLearning Platform)

2025 – 2026

Nyukela Public Service SMS Pre-entry Program

- Module 1: Introduction to Citizenship, Social and economic conditions, Partnerships in building a just and cohesive society, Values and principles that underpin a just society
- Module 2: Introduction to Public Administration, The machinery of government, administrative law planning and delivery,
- Module 3: Ethical Leadership in Government, being an ethical leader, Addressing complex and wicked problems

Wuhan University, Wuhan, Hubei

Bachelor of Computer Science in Software Engineering

2016 – 2020

- Applied programming and software development skills, including OOP (Java), Data Structures & Algorithms, and Software Testing
- Worked with systems and networks, encompassing Computer Systems, Operating Systems, and Linux & Applications
- Utilized expertise in AI and cloud technologies, covering Artificial Intelligence, Big Data and Analysis, and Cloud Computing

Wuyi University, Wuyishan, Fujian

Chinese Language Proficiency (HSK4)

2014 – 2016

Brebner High School, Bloemfontein, Free State

National Senior Certificate

2008 - 2012

- Studied Mathematics & Science to build analytical and problem-solving skills
- Explored Consumer Studies & Languages to understand practical applications and communication

- Engaged in Life Orientation to develop personal and interpersonal skills

PROJECTS

Portfolio: <https://mpethamotaung.github.io/> | **GitHub:** <https://github.com/mpethamotaung>

- **Daxter** – Accountant Data Aggregation Dashboard
 - **Youcipe** – Recipe sharing web application (MVP).
 - **Pixels** – Image processing application / Pixel extractor.
-
